

Pancadrya Yashoda Pasha

AI, Cloud, and Security Practitioner

📍 Bandung, Indonesia ✉ pancadrya.tech@gmail.com 🌐 [pancadrya](#) 📁 [pancadrya](#)
🌐 [pancadrya.my.id](#)

Summary

AWS Certified Cloud Practitioner and Informatics Engineering graduate specializing in Cloud Infrastructure, Security, and Artificial Intelligence. Adept at bridging the gap between advanced deep learning development and secure, optimized cloud environments to deliver resilient, privacy-first enterprise solutions.

Skills

- **Cloud & Infrastructure:** AWS (EC2, ECS, ECR, S3, VPC, ALB, IAM, CloudFormation), Docker, Infrastructure as Code (IaC) principles, Serverless Architecture, FinOps
- **Security & Data:** Amazon Athena, CloudTrail, CloudWatch, AWS WAF, PostgreSQL, DynamoDB, Vector Databases (pgvector)
- **AI & Development:** Python, Deep Learning (YOLOv11, MobileNetV2), LLMs, Retrieval-Augmented Generation (RAG), Boto3, Linux Bash

Experience

AWS re/Start Program Trainee 10/2025 - 12/2025

- Spearheaded monolith-to-microservices migration using Docker, Amazon ECS, and Application Load Balancers (ALB) within secure custom VPC topologies.
- Executed real-time cloud digital forensics via Amazon Athena and CloudTrail, and automated compliance using CloudWatch and EventBridge.
- Projected 50% EC2 cost reduction through FinOps workload rightsizing, and built serverless architectures using DynamoDB, Boto3, and S3.

Department of Informatics Engineering, UIN Sunan Gunung Djati UX/UI Research & Frontend Developer Intern 08/2024 - 12/2024

- Translated stakeholder requirements into functional prototypes and mapped end-to-end help desk workflows, improving system structure, issue tracking, and cross-team communication.

Projects

Qufy: Privacy-First RAG Document Chatbot Independent Developer 09/2025

[Qufy Documentation](#)

- Engineered a containerized multi-user RAG web app with Docker orchestrating local LLM inference (IBM Granite) to guarantee 100% data privacy.
- Migrated vector architecture to PostgreSQL pgvector for optimized storage of high-dimensional document embeddings.

Deepfake Detection in Medical Images Using YOLOv11

AI Researcher

03/2025 - 06/2025

- Achieved high-precision anomaly and manipulation detection in medical imagery by implementing and fine-tuning the cutting-edge YOLOv11 (You Only Look Once) deep learning framework.
- Collaborated closely with a research team to validate complex computer vision data pipelines, effectively minimizing error rates in automated medical deepfake diagnostics.

GreenEye: AI-Powered Indonesian Plant Recognition

AI Engineer

05/2024 - 07/2024

[GreenEye Documentation](#)

- Developed an end-to-end AI mobile identification system for indigenous Indonesian flora by curating diverse image datasets and fine-tuning a MobileNetV2 architecture.
- Optimized model efficiency for low-power consumer devices by converting the trained network into lighter formats, achieving smooth real-time camera inference without relying on heavy resources.

Seec: Secure Account Data Storage

Independent Developer

01/2024 - 02/2024

- Designed and built a secure credential storage Android application using Flutter with Flutter Secure Storage and local biometrics authentication.

Education

UIN Sunan Gunung Djati	Informatics Engineering · GPA 3.88	09/2021 - 02/2026
------------------------	------------------------------------	-------------------

Certifications & Badges

AWS Certified Cloud Practitioner (CCP)	Amazon Web Services	02/2026 - 02/2029
AWS re/Start Graduate	Amazon Web Services	01/2026
Code Generation and Optimization Using IBM Granite	IBM SkillsBuild	09/2025
Certified International Specialist in Data Engineering (CISDE)	PASAS Institute	12/2024 - 12/2027
CCNA: Introduction to Networks	Cisco	01/2024
